1. LEANDER: "Sweetheart, I'm going into the amokker to smoke a cigar for a while."
LULU: "All right, dear. I hope you enjoy it, I'm sure."

2. SOUR-FACED PASSENGER: "Ah—er—would you mind changing seats with me? There is an awful draught here from somewhere."
LULU: "With the greatest pleasure. I am impervious to draughts."

3. LEANDER (running back from the amokker): "Gee, we are coming to a long dark tunnel. I'll just slip back and in the darkness surprise Lulu with a kiss. Oh, what a joke!"

4. Smack! Smack! Umi Umi Umi Smack!
TERRIFIED VOICE: "Help! Murder! It's a dreadful man! Help! Help!"
LULU: "Oh, this is fearful! I'm so frightened! I wish Leander were here!"

5. SOUR-FACED PASSENGER: "Oh, you BEAST! You DON JUAN! VILLAIN! BRUTE! Kiss me, will you? Take that, and that, and that!"
LULU: "Oh, Leander, how dare you, how dare you! Oh, this is an outrage!"

6. LEANDER: "But, Lulu, allow me to explain."
LULU: "Don't talk to me! Don't tell me you mistook another woman for me! You are a BASE DECEIVER, that's what you are! I'm going to telegraph Mommer!"
SOUR-FACED PASSENGER: "Thank goodness, no man ever dared inveigle me into matrimony, but if I HAD been ensnared by a wretch like that I'd get a divorce!"

Scene 6.

Scene 5

SYNOPSIS OF LAST SUNDAY'S CHAPTER.

Miss Hazel Featherstone, the heiress, trips abroad with Marie, her poor school friend, as companion, but gets so disgusted with flatterers that in London she changes positions with her friend, she playing the poor companion and Marie the heiress. Marie becomes the rage, while Hazel is utterly ignored.

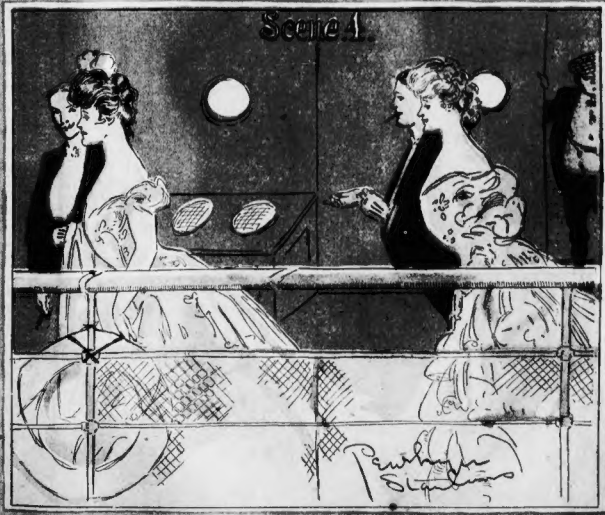

SCENE 4—In proud disdain Miss Featherstone leaves Condon and sails for India, with Miss Marie, keeping up the illusion. Aboard ship they meet Cord Hugh Trauers and his traveling secretary. Cord Hugh gets immensely—don't-ye-know—interested in Marie, while Hazel finds herself becoming really quite interested in the secretary.

SCENE 5—The last day at sea Cord Hugh is precipitating a proposal, and Marie, embarrassed, begs leave to divulge the secret. Hazel bids Marie to possess her soul in patience just a little.

SCENE 6—Same evening on deck the secretary takes the real Hazel's little hand in his and offers her his poor heart and 200 pounds a year. Hazel is in ecstasy.

(Concluded Next Sunday.)

Scene 4

Why the Home Moon of Mr. Oliver Herford, Wit, and His Witty Wife Was Wrecked

Wit for Breakfast, Epigrams for Luncheon, More Wit Again for Dinner Was too Cloying As a Steady Diet, and So the Very Clever Bridegroom and His Very Clever Bride Wore Each Other Out With Brilliancy.

NEVER has a more poignant tragedy befallen the circle of literature than the disagreement between Oliver Herford, the wit and artist, and his wife, Miss Margaret Regan, the wit and beauty.

It is not a tragedy of violence, but it is none the less cruel, when one considers the susceptibility to suffering of the modern artistic temperament.

There have been many domestic disasters due to the inability of one of genius to agree with ordinary wives. Carlyle and his wife and Byron and his wife are examples. But those disasters arose from the failure of ordinary womanhood to appreciate or humor genius sufficiently.

In this case the trouble is entirely due to too much wit on each side.

In Herford had been called by William Dean Howells the Charles Lamb of America. He is the author of "The Rashful Marchioness," "Wagoner for Infants," "The Cynic's Calendar of Revised Wisdom" and many other delightful works. He is also remarkable for a constant flow of wit and witticisms in conversation, too voluminous for any man to write out. It was he who said in reference to Mrs. Brown Potter on a celebrated occasion at the Players' Club:

"Actresses will happen in the best regulated families."

When an old gentleman at the same club went to Herford to be quiet, because he couldn't speak the author replied:

"Tell him I am very sorry. I could read at home."

"I can't leave, it's my wife's reception."

It was too small for you to change your mind in."

Presently Mr. Herford remarked airily to the maid, in the Horatian style:

"Wine! There isn't any," said Mrs. Herford.

It was at a dinner given by R. H. Roth that Oliver Herford and Margaret Regan first met. Miss Clara Loftus helped Mr. Herford to bring together the guests, and she secured Mr. Herford in a conversation that ran something like this:

"I want you as a special favor to be at the Saturday dinner on Monday evening."

Mr. Herford, trying to be polite and yet disposed to escape—awfully sorry, Miss Loftus, dear, but I have an unbreakable engagement for Monday."

Miss Loftus (disappointed, but resourceful—Then you must dine with us, my friend Miss Regan and I, on Tuesday."

Mr. Herford (regretfully)—I am grateful for the opportunity, but as my Tuesdays are always taken up with my—my publishers, it will really be impossible—for Tuesday."

Miss Loftus (mentally revivifying her dates)—Fortunately we have nothing on after the theatre Wednesday evening. Suppose you call for us at the stage door? Mr. Herford—My dear Clara, on Wednesday I am off for the country—lecturing."

Miss Loftus (incredulously)—Lecturing? Oliver Herford, you would slide through the floor of any lecture platform on earth. But if you are so busy, you shall come Thursday."

Mr. Herford—Oh, well, dear, it'll come on Monday."

Miss Regan was an ideal Irish beauty, with raven hair and deep blue eyes. Mr. Herford was immediately smitten by her beauty, and he also found that her mental attainments were equal to her charms. She spoke of apparent popularity, after the second number was issued. It contained such gems as this on the subject:

"The stars enjoy a life of ease; He hangs himself from the trees. And views life upside down. If you, my child, are nothing but a To live in Je-sa-lou-son and study. Un-heeding the world's frown. You, too, my child, be told and strive. May take a humorous view of life."

And this naive confession, apropos of the self:

"Oh yes, the wolf is bad, it's true; But how without him could you do? If there were not a wolf, what good Would be the tale of Mid-in-the-wood? The little child from sin will fly. When told the wicked wolf is high; And when, arrived at man's estate, He hears the wolf outside his gate. He knows it's time to put away Idle flattery and pay. That's how (but do not mention it) This paper happened to be written."

Despite the moral of the weekly turned verse, the whimsical, authorial, names

decoration his studio with his unreluctant filia."

decorated his studio with his unreluctant filia."

decorated his studio with his unreluctant filia."

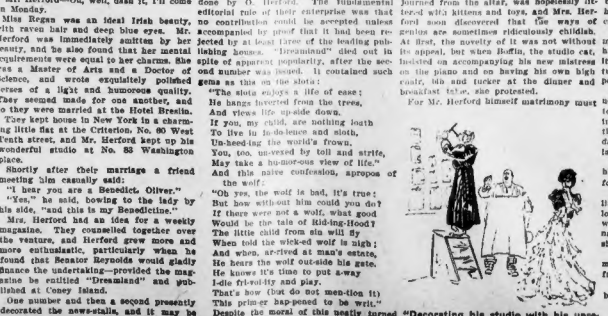

Mrs. Oliver Herford.
(Margaret Regan.)

"How did we ever come to marry, Oliver?"

"Why, Peggy, the apartment you had was too small for you to change your mind in."

"His studio, to which they adjourned from the altar, was hopelessly lit with kithens and toys, and Mrs. Herford soon discovered that the ways of genius are sometimes ridiculously childish."

have had many severe and unexpected trials. He had always seen the lion of the social circles he had frequented. Now he found himself somewhat thrown into the shade by a pretty and witty wife. All the artist friends wanted to paint her portrait, so they said. Among those who did so was the well-known society portrait painter, Wilhelm Funk. Artists and men of letters clustered around Mrs. Herford and left Mr. Herford staring suggestively at the ceiling in a corner.

During the latter part of the Winter a large reception was in progress at the Herford studio. Among the hundred or more guests was a young artist who was numbered among the many new acquaintances the hostess had made during her first season in the metropolis. For some reason the crowded affair was becoming extremely wearying on the youthful painter who, discommodately wandering, said the company, met Herford, and the latter, although unknown to him personally, impressed him as being a fellow sufferer.

Dispensing with an introduction, the guest, politely delivered his opinion of the event, and hopefully suggested that they adjourn to the club.

"Friendship is more to be valued than love, for love is a thing a man can buy and a woman can get for nothing."

"Saint heart never won fair lady."

"People who live in glass houses should pull down the blinds."

"Constancy, thou art a snail."

"A bell on a bonnet is worth ten as a plate."

"Wife will have a full bonnet."

"Young widows in rich robes and robes."

"A little widow is a dangerous thing."

"As the hawk has made his bed, why lie about it?"

"Abstinence makes the heart grow fonder."

Murdered,
Robbed and
Then Buried.**

Paris, Aug. 31.

NEVER in modern times has a mysterious disappearance excited greater interest than that of the Abbé Delarue, cure of the little parish of Chateau, near Etampes.

It is assumed that a foul murder has been committed. All the paraphernalia of detective work, all the midnight sleuthing, all the imaginative reasoning that marked the unravelment of murder mysteries in the works of Gaboriau, Rou and Edgar Allan Poe have been exhausted in vain. The police have been called in, and the modern crime hunters have now hit upon a device beside which the methods suggested by those famous authorities on crime pale into lameness and insignificance.

A live hyena of the desert—an animal expert in hunting for all dead things—has been employed to find the body of the priest.

The disappearance of the Abbé Delarue was certainly an astonishing affair. He rode out of his parish on a bicycle into the night and never came back. He left hardly a trace of anything that could point to the cause of his disappearance.

The Abbé was an extremely popular man in his parish. He enjoyed a good reputation. He was in excellent health and spirits. He had just been planning a visit to his mother in Paris. This was no desirable reason why he should have committed suicide or voluntarily run away.

He had, however, this France in money on his person when he disappeared, and the most obvious course is to suppose that he was murdered for the sake of the money.

Whether be the truth, it is at present wrapped in mystery. The Abbé Delarue left the town of Etampes at about 8 o'clock in the evening, riding his bicycle. He was returning to his parish. At five minutes past nine he was seen rapidly riding along the road by a locksmith living at the farm of Longueval.

He was seen by one or two other persons just before this time, but never again.

After his disappearance the police of Etampes, a sleepy country town, showed great negligence in investigating the case. This fact, together with many other re-

How Hearts Are Sometimes Broken Unawares. MANY men are so well aware that their quite ordinary attentions to a girl may be misinterpreted, that they intend to make a great deal of women, which has crept into one of late years. Both men and women have an extraordinary to show the least sign of friendship toward a girl for fear that they should be supposed to want to marry her.

Now, this has a very bad result in two ways. It spoils pleasant intercourse between the sexes, and it alienates many a marriage that might otherwise have taken place, simply because a man was afraid to reveal himself by showing a preference for one special girl's society, and so could not give any enough of her to decide whether he wanted her for his wife or not. It may be said that there are few things more likely to lower the marriage rate than this "idea" that because a man shows a liking for a girl's company he must needs have serious matrimonial intentions.

But it is excessively awkward to create a false impression in this matter, it is far better to steer a course that shall make any misapprehension impossible. It is better to do this by avoiding the society of girls altogether, as the manner of some men is! Not so, for that society is a man's way to find a woman to marry! And even apart from the marriage question, how harmful and deteriorating it is to a man's whole

"Every time the hyena's blood-curdling shrieks and fiendish laughter rend the night air with unusual violence, the listeners believe that he has at last found the object of his dreadful quest."

They began to investigate with extraordinary enthusiasm and ingenuity.

The Matti was the first newspaper to begin operations. Two members of its staff went to the spot and spent money lavishly in employing local searches.

The country where the Abbé was last seen was a very favorable hunting place for a dead body. The sand could be turned over by hand until a hole sufficiently deep had been made to bury a body, and then the hole could be filled in by the same means.

Both the monks and the sand beds would offer a very favorable hiding place for a dead body. The sand could be turned over by hand until a hole sufficiently deep had been made to bury a body, and then the hole could be filled in by the same means.

On the other hand, there are the ponds. The largest is known as the Pond of the Moutier. It is surrounded by reeds that grow to twice the height of a man, and if the criminal could have carried the body through there without breaking them down extensively he might have disposed of it very effectively.

The Matti offered a reward of 3,000 francs for his discovery and also engaged a force of six detectives at day wages to search the country for the body. The first discovery they made was the broad-brimmed hat of the priest, which was found in a field off the roadside, torn and soaked with mud.

Then the Patrie of Paris entered into the contest with a Hindu priest named Ravah. This man is skilled in all the mysterious esoteric learning of the Orient. He is reputed to possess the gifts of second sight and prophecy. He can go over into the future, and his vision passes through material objects. Ravah ran through the woods and over the sand beds, picking up pieces of earth and leaves and smelling them. On the second day his intuition led him into a wood of a hollow unfrequented road leading to the Chateau de Valery.

Here he made the first important discovery of the search—the priest's bicycle. It is generally assumed that the murderer had hidden it there after killing him.

At about this time many newspapers appeared on the scene. The most important, among them being the *Magasin*, *Le Monde*, *Le Figaro*, and *Le Petit Journal*, all of which have great many readers.

Then the Matti thought of an absolutely novel, if rather gruesome, method of hunting for the corpse. It depends upon the employment of a hyena in the search, and arranged by the famous lion tamer, Paul Pons.

He has obtained the use of his largest and fiercest hyena, named Carlos. This animal is the most powerful and ferocious in existence. He lives exclusively upon carrion and the dead body of a man has for him a greater attraction than any other kind of food. The hyena lives in holes and caves during the day time and only hunts his food by night. He then utters blood-curdling shrieks and fiendish laughter, which when heard in the desert alone, scenes of the vilest description call up in the imagination of the traveler the forms of spectral ghouls, searching for their own natural prey.

The hyena is of hideous appearance. He has a coat of dirty yellow, marked with spots and usually covered with moss due to rubbing against rocks and scattered with remnants of his disgusting food. He stands very high at the shoulders and his head hangs down till his nose touches the ground. He always stalks along sideways with his head near the ground and never comes straight toward any man or animal.

All these perquisites give him an indescribably mean, sneaking and cowardly appearance.

The hyena is furnished with retractile claws of such tremendous scratching power that he can dig down into the hardest grave and rob it of its occupant. In countries where hyenas abound only the heaviest tools will protect the bodies of the dead from their clutches. It was for this reason that ancient Egyptian and other Oriental kings were buried in rock tombs.

The hyena also has teeth and jaws of such strength that he can bite through the bones of the largest animals. His physical powers would make him a dangerous foe, for he possesses the keenest eyes, but he has not the spirit to attack found. The hyena will only work at night. Carlos will only work at night. Carlos will only work at night. Carlos will only work at night.

HUNTING DOWN & MURDER WITH A STARVED HYENA

The Spot in the Woods Where the Priest's Bicycle Was Found by the Magician Ravah.

terper in which he appears to have neither can to dig into the earth with tremendous

at last found the body and this impression

was confirmed when, after digging down

some three feet, a quantity of bones was

unearthed. A sickening odor of decaying

flesh filled the air.

Carlos buried his nose in the carrion.

After he had devoured a few mouthfuls he

was with great difficulty dragged away

from his meal, for it is dangerous to cheat

even this cowardly beast of his food.

The police and the amateur detective

gathered over the body, but a very hasty

examination showed it to be that of a cow

—probably one that had died of disease

and been buried by a farmer there as the

most easy way of disposing of it.

On the following night the hunt with

the hyena was resumed, but without result.

Night after night it was kept up systemat-

ically. It has now been continued for over

a week. The trapper Yvon and other per-

sons who are familiar with the habits of

hyenas declare positively that no dead body

within a distance of a mile can escape

his wonderful scent. He is being led over

the whole country within a radius of ten

miles of the spot where the hyena was

found, and if the priest lies anywhere in

this region it is not conceivable how his

body can escape discovery. The hyena's

scent will enable him to discover the re-

main, whether he be buried in an open

field or in the cellar of a house, or in any

other part of a building.

Every time the hyena's blood-curdling

shriek and fiendish laughter rend the

night air with unusual violence, the listen-

ers believe that he has at last found the

object of his dreadful quest.

A New Model for

From the Top of Her Head to the Tips of Her Toes

A Hat by Riboux, of Paris, with the New Tilt, the New Crown and the New Uncurled Plumes, in Pale Blue Velvet.

The Most Coquette and Alluring Models in Hats. The Prettiest New Conceits in Girdles.

These twenty little tipped panache hats, that looked first nearly over one's nose last Spring, have passed away, and in its stead, and behind us have again the marvelous picture hats, with their deep, wide brims sweeping in graceful curves, and over which fall plumes in all their variable magnificence in efforts of much richness in line and color.

So few, indeed, are the small hats—they are confined, in fact, to small tailored toques and hats for the country—that one might say with safety that only the big hat will be worn the coming season.

Last season the hats had a straight tilt from back to front, but the new hat has a sliding tilt from the left side of the back and down to just over the right eye. Most of the larger hats are built on the lines of the Empress Eugénie hat of the Second Empire.

The brim is narrowest on the right side in front and widest on the left side in the back, where the side, soft brim falls in a graceful curve.

The crown is rather large, and a favorite pattern is the soft shirred crown, the necessary height being given to the hat by the plumes and the high barrette underneath. On some of the smartest hats the brim is the new mushroom shape, worn standing sideways on the back.

A really delightful creation, a hat of French origin, the Fifth Avenue Importer, of New York, a sailor shape in pale blue velvet. It is to be set straight over the face, but has a high barrette in the back covered with pale blue satin; the brim is also bound with satin. One extremely large wing, especially tailored to a delicate shade of blue and nestled with smoke-colored feathers are set like flattened Mercury wings on the crown of the crown and extend far out over the back. A narrow fold of silk is set between the wings in front, giving the effect of a deep slit buckle. Folds of silk are brought around in front underneath the wings and around the crown.

The Very Newest Hat Creations.

A style of much distinction is shown in a large black and pink picture hat from Mr. Lewis.

This hat is also set straight on the crown, but tilted forward a trifle. The most striking feature is the brim, which is of black velvet and edged with pale pink plush and very wide in the back, where it is pulled high above the crown and arched down toward the front, where it is curved slightly over the face.

The crown is a high, round shape but lavishly, as it is covered draped with three tufts of pink and white Dresden ribbon. A large arrow, also set on the right side of the crown.

The back of the hat shows the pink facing of brim and bands of pink satin.

How a Jealous Husband Was Cured.

RECENTLY this newspaper printed a page of "Love Letters" by Mr. J. H. Ford Wadhams on how to win back his wife. He had written her a letter, and she had just appeared, the following letter describing a rather unusual and perhaps risky experience in a similar object, has been received:

To the Editor:

In Mrs. Wadhams's case, declared in your Sunday Magazine on July 22, she knows how much I loved her and how much I loved her. I am just exactly, but has been married twice. It is of my second husband that I speak. We had been married three months when my mother-in-law came to live with us. I honored her therefore not along alone. My husband was then a traveling man (he has since given it up) and would be away from me to three weeks at a time.

I noticed my husband's love grew cold and more distant and I determined to discover the cause. On his return from his last trip the only thing he said was:

"Where is mother?"

On my reply that she was away visiting, he said that she did not return until

Friday, and I have learned that on that

Hat by Lewis, of Paris, in Black Velvet and Pink, with Novel Crown in Dresden Silk.

above which an exquisite plume of the same shade is held straight across, giving that indescribable, unmistakable ratchet of Paris that is so illustrious and stirring.

A confection in delicate blue is a hat by Riboux, most graceful, most admirable. A sailor brim of pale blue velvet is set high on a band of pale blue satin, and the side of the brim bound with satin.

A large tan crown of shirred velvet is set well forward on the brim, which is very narrow in front, and extremely wide on the left side of the back. The hat has the new side tilt, which is emphasized by two plumes of pale blue, inserted, and tipped with smoke color, which are set in front and drooped over the back of the brim.

Two oval bands of black velvet and gold hold the plumes in front.

The very novel feature of this hat is the use of velvet "filling" instead of the usual under the brim. A filling of pale blue velvet with a heavy cash cord shirred in the edge resembles a huge velvet flower and gives a most striking effect to the back of the crown.

A smart little walking hat in one of the narrow draped toque shapes is another by Lewis—a plume of pastel colored felt draped in soft folds. Around the brim is set a band of smoke-colored velvet. The wings are as marvelously tinted as a lot of mother-of-pearl, blending from blue to pink and from yellow to green, and ready to peckily white dashed with smoke color at the tips. One wing is turned over the face, the other two are draped over the brim in the back and a third in place by a band of smoke-colored velvet.

Very large roses will be worn on many of the handsome hats this fall.

An admirable hat by Riboux is of nut-brown velvet trimmed with gold. It is an oval shape, the brim very wide at the side, with a slit curve over the crown. There is no set tilt to the hat, but a barrette in the back gives it the necessary height. A large rose of velvet is set on the crown, which is covered with the same velvet and a belt of white and gold is set over the brim in the back. The hat is falling over a brim in the back. The hat is filled with maline.

While the great vogue of the "Princess" and Empire styles has attracted some of the use of one of the many attractive styles in which the deep girles come. The new girles being the newest, most of these girles are made of satin lilies in shades to match or harmonize with the costume, and are draped in graceful folds over a feather bow foundation.

Most of them fasten in the back with French knots, rosettes or a buckle effect in ribbon covered with an ornamentation. Showing the Correct New Shape, New Tilt, and a Delightful Mating of the Plumes.

A Violet Hat in the New Sailor Shape, with a Clever Effect in Swags, Wings, in Pale Blue Velvet.

The Newest Caprices in Shoes and Slippers, and Boots and Gloves. Her Diquant Stockings.

It is particularly essential that the shoes should be harmonious in style and in perfect harmony with the costume.

An entirely new departure in boots is a dainty little street boot by Stern, New York. It is shown in a new leather called "dressed", as pliable as kid, strong, and taking a polish as brilliant as the regulation patent leather.

A Fashion Peep at the New Stockings.

Even for evening wear the new puttees boot for hunting, riding or tramp-

ing; it combines the advantages of the ordinary boot with those of the puttee leg.

No many changes have been rung on the ever-popular Louis XV. and Colonial styles, but it seems incredible that anything really as novel as those styles could be created. Yet the new French slipper shown by Stern is certainly an entirely original and pleasant idea. The peculiar way in which the slipper is undressed and the absence of all seams on the top or ball of the foot are particularly clever.

Some of the most attractive styles for evening are Louis XV. designs in black silk or satin heavily brocaded with rose-colored flowers, with pale green foliage and with cloth of gold rosettes or jeweled brooches.

A pair of black damask leather slippers, with a barely design, in gold leaf, that give the effect of a bit of Japanese lacquer work, are truly striking.

Even for evening wear the "Vesper" shoe is becoming popular, and only the very daring will wear less than two inches high on the street.

The lace shoe is still shown, but the button is the favorite street shoe for this Autumn.

As to be perfectly appointed, the shoe, like the hand, must be given the most and sweet consideration. While stockings for street wear, it goes almost without saying, should never be as pronounced as they attract attention; there is still ample and sufficient room for originality and design.

The gaiter hose that have had such a vogue the past summer, will continue to be worn during the early Fall. For later wear side stockings with the new cloaking in soft or vart-colored cloaking will be very smart for street wear. A very charming idea has just been shown in black silk hosiery by Stern, embroidered in a double row of tiny pink, embroidered.

For evening wear gaiter silk, in black or white, with Point d'Angora or Point de France, will be much in vogue in many designs. One very daring pattern is a serpent of lace curled about the ankle.

Science Proves Plants Have Nerves.

Most persons have heard of the "Pens" as a "living plant," which shrinks from rough handling and expands under the touch of the scientist. The fact that all plants are sensitive, that they have a nervous organization like that of the human body, has been proved by the work of C. H. Sherrington, physiologist, and attributed apparent evidence of sensation in plants to a disturbance of the equilibrium of the plant in this case.

Now they know that plants have really a nervous organization, and respond in a way to external stimuli.

Professor Ross reports the plants as a machine, complex, capable of delicate response to external stimuli, including movement, and with the power of holding back part of the energy of the stimulus, and then showing the external stimulus induces contraction, and latent energy induces expansion. The interesting of this contraction and expansion is found to account for the various phenomena characteristic of life. Not the least important part of this conclusion would seem to be that it brings to the close relations between the plant and the animal, which has been previously detected. He finds no exception to the rule that response is always by contraction of the more excited side of an organ.

CHAPTER XXVI

TIOE and I started out one morning with Mary Jane, who had joined us at Bayshore, to introduce her to our friend the cheerful lunatic. Mary Jane and I rode upon my ponies, while Tige ran along beside us. Long before we reached the asylum we met our friend sitting upon a stone wall. He had his head in a bandage which covered his eye.

"What's the matter with your eye?" asked Tige.

"Well," he said, "a cow bit me."

We didn't believe him, of course, so he went on to tell us how he had been splitting firewood and a piece had fallen on his head and hit him in the eye and blacked it.

"What have you put on it?" asked Mary Jane.

"Well, the doctor put a leech upon it to draw the blood and inflammation out. Don't you know what a leech is?" he asked us in astonishment, as he noticed the inquiring look on Mary Jane's face. "Well," he said, "a leech is a kind of a worm found in creeks and ponds, and when a little boy goes in swimming the leech will attach himself to his flesh and hang on with all his 'hangers on' and suck the blood. The real definition of a leech is a doctor. The leech is a doctor,

The AUTOBIOGRAPHY of Buster Brown

by R. F. Fontenault

"MARY JANE AND I RODE UPON MY PONIES, WHILE TIGE RAN ALONG BESIDE US."

"AWAY THEY ALL WENT IN A BUNCH"

that's why they call him leech. His Latin name is Hirudo medicinalis, but he doesn't care. When you have a bad bruise or terrible inflammation leeches will suck all the blood out and relieve it. Yes, there are different kinds of leeches, even mechanical leeches, but the commonest kind is the human leech. Every institution has its leeches (some people call them grafters) which live off the efforts and energies of others. The drones in the beehive are one kind. Every political office has its leeches. The leech is one thing that can be made; he doesn't have to be born. Some men are born leeches, some acquire leeches, while others have

leeches thrust upon them. That's me," he said.

"You mean that's I," said Mary Jane; "but tell us more."

"It is the leech which keeps lawyers busy and the courtroom full. When one energetic man invents something or creates something half a dozen human leeches will pounce upon him and try to suck his blood and brains. So to rid himself of them he must go to law to prove that what is his is his own. Some men become leeches who didn't start out to be, but who found a good thing to attach themselves to and finally, after they have lived on the good thing for a long time,

lose their own ability to do anything else and just settle down as a professional parasite. If you should lie in bed for a few months you would find when you got up that you wouldn't be able to walk because you had not used your limbs for so long. Anything will grow useless from non-use and inactivity. There are even institutions that are leeches and which live off the efforts and superstitions of the public."

"But doesn't a leech do anything at all?" asked Tige.

"Oh, yes, of course, he sucks your blood."

Tige thought it all over for a few minutes, then burst into a roar of laughter and fell off the wall. He fell right into a big bumble bee's nest which was concealed under the bushes. Out flew the bees, and would have settled down on Tige, but he flew. They flew after him, and away they all went in a bunch down the dusty road and soon disappeared from sight.

After they were gone our cheerful lunatic opened up the bees' nest and took a lot of honey, which he began to devour with pleasure.

"You see," he said, "this is a leech trick I am guilty of right now." And away he strolled toward the asylum.

Mary Jane and I mounted our ponies and started off in the direction of Tige's flight. We met the bees coming back. They had given Tige up, for, as we found afterward, he had jumped into a creek and foiled them (as it says in the cheap detective stories), so he was all right.

(To be continued next Sunday.)

FOXY GRANDPA

1. BOYS: "We will wrap these bandages about us and pretend to be hurt. That will give Gran'pa a good scare."

2. GRANDPA: "I'll just punt up this old football and see if I can't frighten the boys."

3. BOYS: "Ah, there comes Gran'pa. We will pretend an automobile ran over us. Goodness, won't he be frightened?"

4. BOYS: "Great Scott! Look! See what Gran'pa is doing!"

5. GRANDPA: "Ah, there, boys! Now was that for a kick?"

6. GRANDPA: "Why hello, you young rascals! Can't you see it's only a little joke?"

EDITORIAL SECTION

BOSTON AMERICAN, SUNDAY, SEPTEMBER 9, 1906.

EDITORIAL FOR TEACHERS

FATHERS and mothers have been urged by this newspaper many times to encourage and develop the imagination of their children. To-day we talk to the SCHOOL TEACHERS of the nation about to resume the sacred task which this Republic places upon them.

There is no class of citizens more deserving of universal thanks, admiration and gratitude than the school teachers.

And any suggestion made to teachers should always be prefaced by sincere thanks for good work, great patience, tireless devotion.

Teachers, everything that the nation is to be depends upon YOUR WORK. When we pass a fine orchard, we cannot fail to think kindly and reverently of the man who PLANTED the trees.

You school teachers are planting the trees of the future. Every man of value to humanity in the next generation will owe inspiration to some of you.

You are the planters of ideas, you train the mind, you encourage the childish, hesitating intellect, AND THE CREDIT FOR THE RIPE FRUIT WILL BE YOURS.

Above all things, ENCOURAGE THE IMAGINATION OF THE BOY AND THE GIRL.

Remember that as the public school represents the essential element of republican government, so you are the custodians of freedom in the next generation and the POLITICAL teachers of the child above all.

Teach the child to THINK BROADLY. TEACH HIM THE PART THAT THIS COUNTRY PLAYS AND THAT IT SHOULD PLAY AMONG THE NATIONS OF THE WORLD.

Make him understand how much depends upon moral courage in the citizen. Teach him what moral courage IS, teach him to love it by making him acquainted with the great men whose chief possession it has been.

Remember that mere spelling and ciphering ARE THE LEAST PART OF THE KNOWLEDGE THAT YOU GIVE TO THE CHILDREN.

The important study for human beings is HUMANITY ITSELF.

Concentrate your own minds, teachers, upon the greatness of human possibilities, upon the wonderful future of this race, and then communi-

The Child's Imagination—It Means the Development of the Greatest Force in the World. Imagination Is the Eye of the Soul Through Which the Wonders of the Past Are Seen and the More Wonderful Future Foreshadowed.

cate to your children the enthusiasm of your own spirits.

Teach the boys and girls—even the youngest—the great simple truths of God's wonderful power, as shown in this universe. Teach them the place of their earth in the great fleet of sailing suns and planets.

Lift their minds as high as the great scheme of cosmic creation and their aspirations will equal those of humanity's great sons and daughters.

Remember that as the fruit is in the tiny sapling which you plant in the earth, so the whole future is in the brains, IN THE IMAGINATIONS of those children that sit before you.

Yours is a THANKLESS task. Your work is

the most difficult that men do. You are expected to have, with dozens of children, the patience and the love that the father and the mother show to a few.

The work that you do is underpaid, and what is worse, IT IS NOT APPRECIATED.

The world perhaps will never realize how much it owes to your patience and conscientiousness.

But there is glory in all good work and there is happiness in the consciousness of self-denial and of duty done.

Every human brain comes into the world with unlimited possibilities. The little, dull face that

looks up at you, and that seems almost hopeless in its dulness, may be the face of another Newton, stupid at school, but destined THROUGH WONDERFUL IMAGINATION to take the highest rank in human genius.

The work that you have got to do is wearing on the nerves. And a child, aimlessly questioning, restlessly inquisitive, is not always easy to manage after long hours of dull routine.

Remember that in each of those little heads there is struggling a spark of divine intelligence. There is an atom of that thinking force destined to rule this earth.

You have in your care all that there is of humanity, which is ITS FUTURE.

And you know that the only thing of value in the world IS THE NEW THOUGHT.

So stimulate and encourage patiently that restless imagination, in which alone original thought can find birth.

TEACH YOUR CHILDREN, ABOVE ALL, TO READ WITH IMAGINATION. A man truly great has said that a teacher is to be judged chiefly by the intelligence and ease with which his pupils CAN READ.

The human being able to read absolutely easily and intelligently holds the key to all knowledge.

The grown man uses but little of the technical teachings of his school days, the algebra, the geography, etc.

BUT HIS ENTIRE INTELLECTUAL GROWTH DEPENDS UPON HIS READING.

If you teach a child to read easily and intelligently, UNDERSTANDING WHAT HE IS READING, you have conferred the very greatest blessing upon that child.

To the extent to which discrimination is left in your hands, we urge upon you to continue the work of Gutenberg, and to spread the teachings of the great writers by making your class above all A READING CLASS.

To the teachers of the nation the children are confided for another year. The story of the good work that is to be done this Winter in the thousands of schoolrooms by millions of children will be reflected in every achievement of the next generation.

It is to be hoped that parents will appreciate the teachers, co-operate with them, inculcate respect for the teacher in the child.

It is to be hoped that the public as a whole will show appreciation of the work that the teachers do. The teachers should be the most highly honored public officials. They should be generously paid and generously pensioned, and to this end in return for the good work that they do, this newspaper and others will strive permanently.

HELEN BY ELLA WHEELER WILCOX

Copyright, 1906, by American-Journal Syndicate

ON THE ISLE OF CRANAE.

THE world an abject vassal to her charms,
And Kings competing for a single smile,
Yet love she knew not, till upon this isle
She gave surrender to abducting arms.
Not Theseus, who plucked her lips' first kiss,
Not Menelaus, lawful mate and spouse,
Such answering passion in her heart could rouse,
Or wake such tumult in her soul as this.
Let come what will, let Greece and Asia meet,
Let heroes die and kingdoms run with gore;
Let devastation spread from shore to shore—
Resplendent Helen finds her bondage sweet.
The whole world fights her battles, while she lies
Sunned in the fervor of young Paris' eyes.

ON THE ISLE OF RHODES.

THE battles ended, ardent Paris dead,
Of faithful Menelaus long bereft,
Time is the only suitor who is left:
Helen survives, with youth and beauty fled.
By hate remembered, but by love forgot,
Dethroned and driven from her high estate,
Unhappy Helen feels the lash of Fate
And knows at last an unloved woman's lot.
The Grecian marvel, and the Trojan joy,
The world's fair wonder, from her palace flies.
The furies follow, and great Helen dies,
A death of horror, for the pride of Troy.

Yet Time, like Menelaus, all forgives.
Helen, immortal in her beauty, lives.

FRANK A. HANKS, 1906

A Short Cut to Fame (The Song Writer) By William F. Kirk

Copyright, 1906, by American-Journal Syndicate

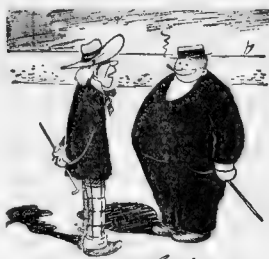

MET him down at Coney Island, wondering along the beach.

"Hello, Bill," said he. "It's kind of nice here, isn't it?"
I told him that I rather enjoyed the sea breeze and the suggestion of immensity and eternity always furnished by the blue line of the horizon.

"Don't you remember," I asked him, "how the immortal Lord Byron once wrote:
"Roll on, thou dark and deep blue ocean; roll!"

"That isn't the idea," said the song writer. "Lord Byron may have been all to the poets, but he never wrote no song hits, did he? Whoever heard of Lord Byron doing anything like 'Dear Mother, I'll Return if I Come Back'?"

"Roll on, thou dark and deep blue ocean; roll!"
I noticed that the maker of popular ballads had something on his mind, and, knowing that it would not take long for him to get it out of me, I kept quiet.
"Bill," he finally remarked, "I've got a peach of an idea. It's sure to get 'em, the rich men in their automobiles and the poor men in their lowly cottages on the moor."

"Lord Byron may have been all to the paprika, but he never wrote no song hits, did he?"

It would appeal with equal force to Caroline Nation at Whitby and Lillian Russell at Saratoga. It will make sad hearts aching and young people older. Ain't you got no curiosity?"

Coming to with a start, I asked him for particulars.

"Dear Mother, I'll Return if I Come Back"

A MOTHER old was setting in her cottage by the sea.
She was setting there awaiting her darling boy to see.
He was a brave young sailor and the ship was on the deep.
And the mother set there waiting, though she wanted for to sleep.

Then came a clap of thunder—an awful storm began:
The mother said, "My boy won't never live to be a man."
The boy stood on the burning deck a hundred miles away,
And as the ship began to sink he started for to stay.

"The boy stood on the burning deck a hundred miles away."

CHORUS.

"Dear mother, I'll return; I have saw you in my dreams,
Dear mother, I'll return if I come back. I love you still, dear mother—I can see you setting there;
Cheer up, dear mother, for I will return!"

II.

THE ship at last went down, and all the sailors took a boat;
Jack put a life-preserver on and started for to float.
He floated, for a minute, then the life-preserver broke.
Jack said, "I guess I am in sock" (he said it for a joke).

At home a gray-haired mother was setting in her chair;
Said she, "I'll make a book my boy has clumb the Golden Rule."
Then Jack said, softly, as he sunk beneath the cold, wet water:
"Dear mother, I ain't wrote to you as often as I oughter."
CHORUS: "Dear mother, I'll return," etc.

Mirandy on the Servant Question

By Dorothy Dix

Copyright, 1906, by American-Journal Syndicate

"I was a seagullin' up my dis mainin," said Mirandy, "I met up wid a mighty fine dressed white lady what stopped me an' asked me if I knowed a good cook dat is a-lookin' for a job."
"Dat I don't," I spones, "but I know lots of jobs dat is a-tryin' to chase down good an' cooks."
"Den dat white lady, what I could see wid one eye in one of dem head women what keeps two servants—one a-agin' an' one a-agin'—lous up against a telephone pole an' says dat she is plumb 'wot to a frazzle wid de servant question."

"I don't know how hit is," she says, fetchin' a sign from de pit of her stomach, "dat as I was to call over de names of de different cooks dat I has had in de past year hit would sound lak de city directory of females."
"Den she up an' ax me why hit is dat gal would rather work in factories an' stores whar by de time dey is paid for deir labor an' lodgin', dey ain't got nothin' to do but wages, den de housework whar dey gets deir livin' throwed in, an' has deir money to spend on longery shirts waist ef dey wants to."

"Well," spones I, "de main reason is dat dere's too much Christian home an' not enough liberty in domestic service. After a gal has worked all day over de cook stove, hit kinder gets on her nerves to be chaperoned all de evenin'. Seems to her lak she would s'pose lak to git de smell of de fryin' pan out of her mouf by walkin' down de streets an' lookin' in at de windows or maybe res' hersef by shakin' her foot at a dance. Ef she worked in a store, or a factory, or tuck in washin', all she would have to do would be to put on her best duds an' light out, but ef she works in anybody's house she is tied down tight an' fast, an' is got to stay dere. Dat's de reason dat all de smart gals passes up de kitchen."

"Do you mean to tell me dat I is got to let my servants come an' go as dey please after workin' hours?" axed de lady in a tone of voice lak she was givin' to throw a fit.
"Dat's de about de way hit pans out," spones I, "unless you wants to sit up an' get yo' own breakfast mighty often."
"I couldn't reconcile hit to my convenience," monna she.

"Shoo," says I, "don't you worry about dat. Most of de hired gals dat I has knowed was on de safe side of fifty, anyway, an' any woman what has got judgment enough to make a sponge cake by her eye-widout measurin' de ingredients, an' hit is reason to taste knows enough to take keer of hersef."
"But dat de woman fetch another nigh, an' headed down de street towards de intelligence office, an' I knowed dat she was still on de track of a gal dat was young an' experienced cook, who didn't want to do nothin' but work, an' dat didn't dat never wanted to go out of night, an' axed her mistress to read her letters to her."

"Assum, dat de trouble. What you hires out to pound de typewriter, or make overalls in a factory, or stand behind a counter, ef you does yo' work right, dat's all dat is axed of you, but ef you undertakes to cook folks' vittles, an' make deir beds, an' sweep deir floors, dey thinks dat hit gives 'em len on yo' secrets, an' de right to pick out yo' husband for you."
"Don't you hear of de boss at de factory, or de manager of de store, a-puttin' deir nose into what a gal's steady company says to her as he hangs over de gate. Nuthin'no' does ef dey warn her against him at dey happens to lak curly hair, an' his is straight, but ef you works out you has to be put through questions about what you said an' he said, and yo' Ma said, an' yo' Pa said, an' whar's his intentions, an' what wages does he git, an' den de mistis winks up by shakin' her head, an' sayin' dat she hopes hit's all right, in dat kind of way folks has when dey means dat dey has got dere 'specions."

"An' another cuse thing is dat folks seem to think dat housework is somethin' dat is as much fun to do dat hit is a pity to cut anybody's pleasure short by lettin' 'em git through wid hit. Any odder kind of work has got some sort of end to hit. You is got a eight-hour job ef you is lucky, an' a ten-hour job ef you ain't, but when you goes into anybody's kitchen yous done signed for one dese heel-to-be-continued-in-our-next-stories gal des runs on from day to day."

"Dat's whar makes gals kinder sour on de work dat is whar de Jenkins kin's woman's natural spear, an' dat mos' of us would lak to do ef dere was any chance of gittin' done wid dinner of a evenin' widout no danger of bein' called on to do a few chores any time in de night."

"Den de reason dat us servants keeps a-movin' on from place to place is dat we're trying to find somewhar whar de mistis will tend to her business an' let us tend to ours. Co's maybe dere ain't no such as Eden, for a woman can't see nothin' goin' on widout wantin' to put her finger in de pie."

"Now, I's a ole experienced cook dat knows my business, ef I does say hit nupsef, but I's been so aggriffeted by little gal bride mistisses dat I's stood over whilst I was a-tryin' to make a cake or a fricassee, buttin' in ev' minute wid a 'now put in de butter, don't forget, dat nothin' but de grace of God kept me a-standin' dere de cypressin' wife to de man, an' about de third day of de kin' of naggin' I turned up missin'."

"Den dere de mistis dat is a-tryin' to never gives yo' enough to cook wid, but always wants ev'rythin' to taste kin' of gus-

"I's been so aggriffeted by little gal bride mistisses."

"An' wid dat I left."

BOSTON SOCIETY WOMEN

AT THE HARVARD BOAT RACE GREAT CAMBRIDGE

MISS OLIVIA THORNDYKE

MRS. J. L. HIGGINSON

MRS. W. G. NICHOLSON

SOCIETY GLORIES IN NATURE AND PERFECT FALL WEATHER

By a Society Woman.

Beautiful autumn days following each other in rapid succession have served to revive completely the glories of the out-of-door sports which are at present being indulged in by the smart set as never before, and society in search of the life more abundant is finding it in the woods and hills.

Golf, tennis and polo enthusiasts are lending life and charm to the landscape. Inexpensively fitted motor cars, too, add life, for is not half the world of society on wheels?

My lady, tired of the ceaseless round of fashionable events, gets a few congenial friends together and whizzes off in the glass enclosed palace for far points which have been traced out on the map, and with no deeper reason than that "it sounds nice and is distant," spins off for a week or two of enchantment with the world all theirs. Wardrobes are provided for the pretty gowns in order that the travellers may present themselves at any smart hotel they may run across. The casual hotel is not depended upon, however, for food and lodging, as my lady virtually carries her own history with her. There are attachments for cooking and ample room for storage of food in her motor palace, as, all in all, she may be several days at a time in the wilderness nor ever miss the comforts of home.

But at the fashion-haunted resorts where the other half of society still lingers, while the younger element, radiant after a Summer of unprecedented gaiety, goes in for the free and open life of the great out of doors, the nature like to amuse themselves lurching and dinner out, playing bridge, driving, and, above all, watching the passing show of youth and beauty and beauty, always on the alert and quite able and willing to keep the ball rolling both on land and water.

North Shore Loses Von Sternbergs

With the advent of Autumn the ever restless fashionable begin again to think of change, and where to spend the few weeks prior to country soot, where they take a much needed rest before returning to town and plunging again into the swirl of things social, is the all-important problem just at present.

Baroness Speck von Sternberg, who, with her husband, Baron von Sternberg of the German Embassy, has spent the Summer at the Little cottage, Beverly Farms, has gone to the Bermuda Inn, in the Adirondacks, for a brief rest and change before returning again to Washington. The Von Sternbergs have meant much to the social life of the North Shore, where the Baroness was generally recognized as the most beautiful of the many charming women of the Summer colony.

Secretary Bonaparte, who, with Mrs. Bonaparte, has been spending the past month at Lenox, returned Friday to Washington. Mrs. Bonaparte, however, did not accompany him, but will remain a few weeks longer to enjoy the invigorating air of the Berkshires. The Secretary has been most persistent in his refusal of all invitations to entertainments, and is returning to Washington much refreshed. Mrs. Bonaparte, on the other hand, has been much in evidence at all the smart affairs, where her beautiful gowns have created no little admiration.

Thayers Lead in Bar Harbor Gaiety.

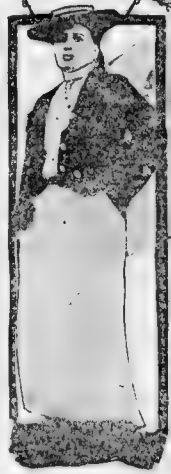

Mrs. Bayard Thayer, who before her marriage was known as the Cape beauty, Ruth Simpkins, in among the recent arrivals at Bar Harbor, where she has entered with her usual vim and enthusiasm into the seemingly endless round of gaieties, and where—now that Mrs. Herbert M. Sears has returned to the North Shore—she enjoys the distinction of being the handsomest matron.

The Thayers have a wide acquaintance among the members of the cottage colony, and Mrs. Thayer was hostess the past week at one of the most charming of the season's hospitalities.

Mrs. James Lowell Putnam, who has been characterized as Boston's most distinguished-looking matron, has just returned from Newport, where she and Mr. Putnam were guests over the House Show of Mr. Francis J. Olin. The Putnams will open their Beacon street home the first week in October.

Vincent Club Girls as Autumn Brides.

The Vincent Club brief season, which opened with the wedding of Susan Jackson and Ralph Wilkins in King's Chapel Thursday, is it seems, to close with one of equal interest and brilliancy, for it is said that Rosemond Little, who bears the distinction of being the first of last winter's debutantes to be

MARY BOWDITCH

SOME OF CITY'S FAIREST DAUGHTERS SEE CONTEST

Many Entertainments and Reunions of American Smart World Held in Honor of Event.

Interest in the international news has been at a high level throughout the past two weeks. The Harvard and Cambridge regatta, which took place yesterday at Putnam, England, is at its height, and those of the Boston fashionable set who have been on the out side in recent days are now in the city to see the contest.

The first element of the city's smart world now about that goes in for sports as well as society—was there to witness, and to cheer for the "home" crew, and many were the entertainments and

some engaged, has decided that her wedding to Karl de Lattre of Minneapolis shall be deferred until late November.

Miss Little spent the latter part of her honeymoon season travelling abroad with her grandparents, Mr. and Mrs. David P. Kimball of Commonwealth Avenue, and it was during this trip that her sister, now Mrs. Talbot Aldrich, became engaged.

Unlike her sister's wedding which was a quiet home affair, the lovely Rosemond has decided that hers shall be a large one at her home church in Salem.

Caroline Morgan to Wed Columbia Man.

Even the knowing ones were surprised at this announcement on Wednesday of the engagement of Miss Caroline Morgan to Stephen F. Stevens.

Miss Morgan is a daughter of Richard B. Morgan of New Bedford, and a niece of Howard Davis of Madison Avenue, New York.

Since her debut three years ago at a ball at the Somerset, where her parents were spending the winter, she has been conspicuous in exclusive circles of New York, Boston and Florence, where she has spent much of her time studying music under Edward Bromberg of the University of Boston.

Mr. Stevens is a son of Mrs. Berkeley Morgan of Long Island, who before her marriage to the late Alexander Morgan was Miss Helen White. Mr. Stevens is a Columbia '05 man.

Blake-FitzGerald Wedding To-day.

Following closely the announcement of the engagement and falling into line with the long array of other Vin cent club marriages, will be the wedding to-day of the ever-lively and interesting Anne Blake to Stephen FitzGerald, son of the Diamond FitzGerald of Brooklyn.

Miss Blake is the daughter of Mr. and Mrs. Francis Blake of Auburn, Maine, whose beautiful home "Keeweenaw" is the centre of much entertainment. Although she is not one of the Vin cent girls in her set she is deservedly popular, and has received much attention since her debutante season.

Mr. FitzGerald graduated from Harvard several years ago, and until the announcement of his engagement was based upon as invulnerable. Mr. Oscar Smith and his daughter Nora are said to be responsible for the match, for it was at a dinner party at their country home "Gleavacourt," in Stockbridge, that Mr. FitzGerald first met Miss Blake.

SOCIETY'S AUTUMN EXODUS FROM NEWPORT HAS BEGUN

Annual Pilgrimage of Summer Colony to Winter Homes Starts This Week.

NEWPORT, R. I., Sept. 8. Mrs. John D. P. Thomas (Miss Lee) of Stonington, Conn., has been seen on the train. Miss Lee, the daughter of New York city and Miss Shirley of Virginia.

Mrs. Thomas is a married daughter of the Rev. Dr. and Mrs. Thomas of New York city. She is the daughter of the Rev. Dr. and Mrs. Thomas of New York city. She is the daughter of the Rev. Dr. and Mrs. Thomas of New York city.

VINCENT BRIDE AT BRILLIANT FETE

Miss Jackson Plights Troth in King's Chapel at First of Autumn Ceremony.

First in the long and brilliant series of autumnal marriages was the wedding in King's Chapel on Thursday of Miss Susan Jackson and Ralph Williams, well-known Boston couples.

Though an early September wedding in town is as unusual as an early June wedding out of town, the ceremony was a happy occasion, and the bride and groom were the center of attention.

The bride, Miss Susan Jackson, was a beautiful girl, and the groom, Ralph Williams, was a well-known Boston couple.

The ceremony was a happy occasion, and the bride and groom were the center of attention.

HARVARD GOES DOWN TO DEFEAT IN GREAT THAMES RACE

Crimson Oarsmen Beaten After Splendid Struggle
Watched by 100,000 Spectators.

Continued from Page 28.

The river was lined with people, the banks in light dress and carrying flags and banners, and the air was filled with cheering. Thronging Crowds the Bridges. Putney and Hammerhead bridges were packed, and even the Barnes railroad bridge near the docks was thronged with spectators. Two hours before the start it was impossible to get over the river at any point along the course. At the starting point and at the finish the crowds were most dense. There seemed hardly room to breathe.

At 4:23 o'clock there was a shout of "Here they come!" from the crowd gathered near the starting line, and the Harvard crew paddled their shells into position on the Middlesex or northern side of the course, Captain Filley having just in the last few minutes.

Harvard crews greeted the Crimsons on shore and continued until the Crimsons came in sight. The Crimsons were then there was pandemonium. The Crimsons were then there was pandemonium. The Crimsons were then there was pandemonium.

BEES STING DOG TO DEATH.
Cambridge, N. J., Sept. 8.—Daniel Parker, a farmer, today told his dog to a fence opposite a hive of bees. It was stung to death within two minutes. Parker at once destroyed the hive.

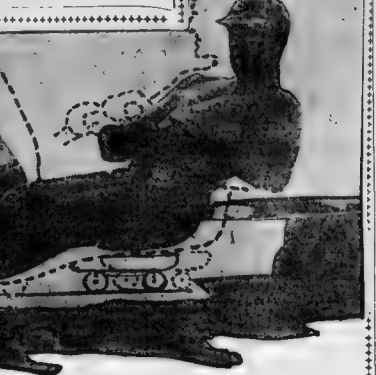

PHOTO-DIAGRAM COMPARISON OF ENGLISH AND AMERICAN STROKE.

English oarsmen swear by their strokes and the result of the Harvard-Cambridge race will doubtless strengthen their firm belief that it is "the only" stroke worth teaching. One of their most celebrated rowing coaches, R. C. Lehmann, tried to teach the English stroke to the Harvard crew, but they would not learn it. They preferred their own stroke, which they called the "American" stroke. They thought it was better and more powerful than the English stroke.

FAMILY HAS FOURTH WEDDING IN 15 MOS.

St. Louis, Sept. 8.—The marriage of Miss Mabel Powell to Harry Sawyer at the home of the bride's mother in Upper Allen recently was the fourth wedding in the family of Mrs. M. B. Powell in fifteen months.

With a family of six daughters and two sons, Mrs. Powell has been a busy woman. Last Sunday Mrs. Powell, with her husband, Harry Sawyer, and their four children, with their husbands and wives, had a family reunion with held on the occasion of the fourth wedding in the family.

STRICKEN AT POST OF DUTY.

Charles N. Quinn, engineer in the Lincoln wharf power house of the Boston Harbor Railway Company, suffered a paralytic attack while on duty yesterday afternoon. He is sixty-three years old and lives at No. 54 Elm street.

A SWEDISH MINISTER

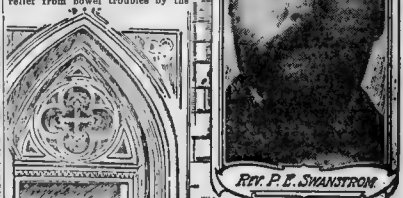

Regains Health by the Use of Peru-na After Three Years Illness.

SEPTEMBER is the month of S. bowel disease, Typhoid fever, and other ailments. It is very common at this time of the year. It produces the condition ordinarily called diarrhea. Catarrh sometimes affects the mucous membranes lining the bowels very extensively.

Catarrh of the internal organs sometimes its victims to malaria. Typhoid fever and bowel disease. Peru-na prevents these autumn ailments by ridding the system of catarrh.

Good sound mucous membranes protect the internal cavities of the body from infection as the same skin protects the outside of the body.

So many people have experienced relief from bowel troubles by the

REV. P. E. SWANSTRÖM

REV. P. E. SWANSTRÖM, Swedish Baptist pastor, box 228, Grandsburg, Wis., writes: "I have used Peru-na according to the directions of the doctor, and I am very glad that I found a medicine which would cure me after three years suffering."

"I had a run of Typhoid fever, and was very depleted. I could eat nothing, I could not sleep, and I was suffering from diarrhea and stomach trouble. I had used Peru-na according to the directions of the doctor, and I am very glad that I found a medicine which would cure me after three years suffering."

HARVARD GUESTS IN FLEET FOLLOW CREWS TO FINISH

Putney, Eng., Sept. 8.—A large number of Harvard graduates and undergraduates followed the races on the Thames today as guests of the Harvard crew. Two small boats were allowed to follow the crews over the course. Two of them were Harvard boats, and the other two were Cambridge boats.

Harvard guests in the fleet followed the crews over the course. Two of them were Harvard boats, and the other two were Cambridge boats. The Harvard guests were very interested in the race, and they were very happy to see their friends and fellow students.

BRIGHT PROSPECTS FOR ELECTION OF MUNICIPAL OWNERSHIP CANDIDATES

ASPIRANTS FOR STATE HONORS WORKING HARD

Thorough Canvass in City Districts by Men Who Seek House and Senate Service.

SOME CONTESTS IN DOUBT

Intense interest is being manifested among the friends of the different candidates in the several wards in Boston who are working the nomination to the House of Representatives and the Massachusetts Senate.

For weeks past the wards have been traversed in a thorough manner, and from the reports returned to the several candidates it is almost impossible to tell who will be the fortunate ones to receive the nominations, which, in many wards, is equal to election.

In Ward 3, Charlestown, the friends of

REPUBLIC ARRIVES AFTER STORMY VOYAGE.

Nearly 1,000 Passengers on Big White Star Liner as She Docks at the Hoosac Pier in Charlestown

The White Star liner *Thetys* after a hard voyage from Liverpool docked at the Hoosac Pier at 7:30 o'clock last night. The liner was ten hours late, the delay being caused by a five-hour wait between Liverpool and Queenstown, and heavy head winds, with encountered the ship all the way across the Atlantic. There were aboard 253 cabin passengers, 212 second class and 421 in the steerage. The sailors and second class passengers were allowed to land at night, while the steerage passengers were held until today. Among those who greeted the large throng waiting on the pier were Rev. James D. North, pastor of the First Baptist Church, Mrs. Reinhold Faxon, of Brookline; Rev. James H. Gallagher, St. Patrick's Church, Boston; Francis B. Crossin, of the Boston Herald; James Jackson, a relative of President Roosevelt; the John M. and Mrs. M. M. Jackson, of New York; Mr. and Mrs. J. M. Stansfield, Mr. and Mrs. J. M. Stansfield, the Boston Herald; Fred Windsor and family, of the Boston Herald; a nephew of Lord Lytton, in the service of the United States; John E. A. Deane and wife, of Toronto; and a second class who had completed a 40,000-mile voyage through Europe.

PICKPOCKET CUTS A YEAR.

Albert Brown, a well-known pickpocket, was sentenced to a year in the State Prison for a recent offense.

HOT STUFF FOR COLDS Chills and Grip Is

SANFORD'S GINGER

For colds, chills, grip, cramps, pains, indigestion, bowel troubles, weakness, nervousness and sleeplessness, for change of water, food, climate, and fatigue inseparable from travel, and a hundred every-day ills, SANFORD'S GINGER is of priceless value. Besides, it's always healthful, delicious, and strengthening.

Look for OWL TRADE MARK on the wrapper. A delicious combination of ginger, Aniseed, and Peppermint. Sold by druggists and grocers everywhere.

To Get More Strength from Your Food.

When the bowels are filled with undigested food we may be a great deal worse off than if we were half starved.

Because food that stays so long in the bowels decays there, just as it if it stayed too long in the open air. Well, when food decays in the bowels, through delayed and overdue action, what happens?

The millions of little Suction Pumps that line the bowels and intestines then draw poison from the decayed food, instead of the nourishment they were intended to draw.

This poison gets into the blood, and in time, spreads all over the body, unless quick action of Constipation is promptly removed.

This causes Constipation, Weak, or Lazy Bowel Muscles. When your Bowel-Muscles grow flabby they need Exercise to strengthen them, not "Physio" to pamper them.

There's only one kind of Artificial Exercise for the Bowel-Muscles.

Its name is "CASCARETS," and its price is Ten Cents a box.

So, if you want the same natural action that is as mile walk in the country would give you, (without the weariness) take one Cascaret at a time, with intervals between, till you reach the exact condition you desire.

One Cascaret at a time will properly cleanse a foul Breath, or Coated Tongue.

Don't fail to carry the Vest Pocket Cascaret Box with you constantly.

All Druggists sell them—over ten million boxes a year.

Be very careful to get the genuine, made only by the Sterling Remedy Company and never sold in bulk. Every tablet stamped "C.C.C."

Prices Advance in Spite of Bank Deficit of Over \$6,000,000

Leaders Evidently Planning to Reassure the Trading Public

BY THOMAS C. SHOTWELL

The success of the campaign is reflected in the fact that the average person in the country has now owned a stock share in a public utility company, and that almost half of the country is now owning homes and in the end we have World Street. The fact that the public is present in such large numbers in these guiding homes shows that there is a disposition among part of the public to divide in stock.

The success of the campaign, in fact, has been thorough, for they have shown the public that the government is not a monopoly of the government. They are encouraged now to go to the campaign forward with renewed vigor. The money market is not a monopoly to the successful campaign which can be drawn from the other considerations being largely matter of the center.

Special to Electric Light Men and Manufacturers

We are prepared to accept your order and give you, making delivery of machines from our own new factory, where we have room to employ the people. We are also giving the finest 200 Watt Incandescent Lights. We are taking orders for cost less generators for arc and incandescent lights on a guarantee not to burn out for 10 years.

You will receive motors and generators guaranteed not to burn out for three years.

If you cannot call, write and ask for our free booklet. It gives full information. Address

Bidwell Electric Company, 139 S. Clinton St., Suite 8, Chicago

Do you know that the demand for COPPER exceeds the supply? That the demand for COPPER is constantly growing? That the greatest fortunes of to day are being made in COPPER investments? That COPPER stocks are safe and sure? That of the seven largest dividend-paying mines in America to-day, six are COPPER mines? That in proportion to capital invested, the COPPER mines of America paid greater dividends last year than any large business enterprise with the exception of Standard Oil?

In this age of electricity, the telephone, the trolley wire and feed wire—all is COPPER. COPPER IS USED EVERYWHERE. It is used extensively in architecture, in cornice work and in builders' hardware. Its by-products, brass and bronze, are used in grille work, bronze and COPPER locks, bolts, catches, in brass beds and furniture, in lamps and chandeliers. It is displacing iron more and more every day.

The Mansfield Group of Mines Is Located in the HEART OF THE COPPER KLONDIKE OF THE WORLD

The Mansfield Property is located in the Wrightson Mining District, Santa Cruz County, Arizona, eight miles from Patagonia, on the Sonora Railway. There are 340 acres in this group of mines, comprising seventeen claims in the richest COPPER district in the world. It is underlain with vast bodies of copper ore, the veins varying in width from four to THIRTY feet, showing high assays, and so located as to require the minimum expense in production of the refined product. These veins show magnificent values, increasing in width and richness as the work of development proceeds. Expert mining engineers state that our properties are right in line and on the same range in which the great COPPER producers of Arizona are located. There are more COPPER smelters located within a radius of fifty miles of the Mansfield Group of Mines than within an equal territory anywhere in the world. The millions of dollars of investment represented in these great smelter plants would have been placed elsewhere had it not been that the mountains and valleys of this district are underlain with such a wealth of COPPER ore as exists nowhere else in the world.

Enormously Rich Copper Deposits in Mansfield Mine

On the Mansfield Mining and Smelting Company's property there are large outcroppings of copper veins which show plainly on the surface. The usual rule is that Copper is not encountered in mining properties until the water level is reached. On the Mansfield Group, water is encountered at a very few feet from the surface. This means a saving of millions of dollars over the expense incurred by many mine owners who have found it necessary to sink shafts from 300 to 2,000 feet beneath the surface before striking shipping ore. Solid bodies of ore of rich quality begin on the Mansfield Mines with the water level, widening and growing richer as depth is attained. The certificate of assay which follows shows the wonderfully rich values in Copper as well as high averages in Silver found on the Mansfield property.

of August, A. D., 1906.

Notary Public in and for Jackson County, Missouri.

Commission Expires June 9th, 1909.

Mr. Moreland is one of the most expert and reliable assayers in the United States. He is a graduate of the State School of Mines at Colorado, and has had fifteen years' practical experience as assayer for leading mines and smelters. Mr. Moreland is the official Government Assayer for the United States Customs at Patagonia, Arizona, the largest and most important Government Assay office in the Mexican boundaries, and therefore the large proportion of all ore shipped from Patagonia to the United States at Kansas City and the amount of import duty collected by the United States Government is dependent upon the assays made by Mr. Moreland.

Plan of Proposed Plant and Development of the Mansfield Mining and Smelting Company, Showing Smelter No. 1, Concentrator No. 1, Shaft and Shaft House, Workshops, Stores, Mines' Cottages and Levels.

ARIZONA LEADS THE WORLD IN COPPER.
No rapid has been the progress of the copper industry in Arizona during the past few years that it is now one of the richest of the great mining states of the world. The second largest producer in the world is the Southern Arizona Copper Belt, which covers an area of 10,000 square miles. In the very heart of the Southern Arizona Copper Belt is the Mansfield Group of Mines, a copper-producing state, and is rapidly developing into one of the great copper-producing states of the world. The Mansfield Group of Mines is located in the Wrightson Mining District, Santa Cruz County, Arizona, eight miles from Patagonia, on the Sonora Railway. There are 340 acres in this group of mines, comprising seventeen claims in the richest COPPER district in the world. It is underlain with vast bodies of copper ore, the veins varying in width from four to THIRTY feet, showing high assays, and so located as to require the minimum expense in production of the refined product. These veins show magnificent values, increasing in width and richness as the work of development proceeds. Expert mining engineers state that our properties are right in line and on the same range in which the great COPPER producers of Arizona are located. First Installment of Machinery Has Been Ordered

With the rich deposits of ore underlying the Mansfield property, it is only necessary that we have the proper equipment to make this one of the greatest COPPER producers and dividend-payers in the world. It is merely a question of installing the machinery with which to turn these rich ore deposits into money to be paid in dividends to our fortunate stockholders. The public has been so quick to grasp the splendid possibilities offered by the Mansfield property and purchased stock so rapidly that the success of this company is now absolutely assured.

In order that dividends may be earned as quickly as possible the Board of Directors have decided to begin at once the installation of the splendid equipment necessary and have authorized the purchase of the first installment of machinery.

Mr. R. B. Brunner, President, Mansfield Mining and Smelting Co., Kansas City, Mo.

HOW MRS. ASTOR "ESCAPED" FROM BOSTON HOTEL TO HER NEWPORT HOME

Guarded by a physician, her courier, her companion, a maid and half a dozen hotel attendants, and after every precaution had been taken to keep secret the time of her departure, Mrs. Astor, who has

MAIN ENTRANCE
TO HOTEL, REPORTERS
PHOTOGRAPHERS &
CROWD WAITED
FOR MRS. ASTOR
TO DEPART

In the accompanying diagram is a rear of the Somerset at the point near a hole in the railway fence to the aperture is from a snapshot photograph of lower from a photograph of the party gap in the fence.

Greater precautions could not have been taken had Mrs. Astor been an empress leaving her palace. Her attendants surrounded her so as to hide her from the gaze of newspaper men. She was in a heavy veil which was not raised once during the trip from the hotel to the car. Once inside the car all the curtains were drawn and she remained in the car until she stepped into the South Station and attached to the train. The train was the 12:30 p. m. train for New York.

Mystery About Plans.

Mrs. Astor was unable to shed about the time of Mrs. Astor's death. From that time on Mrs. Astor was announced that she intended to go to Newport. Not only that, but she was announced that she would go to Newport. Yesterday afternoon a few minutes before

[illegible]

Just here they reached the corner the chair was lifted from the sidewalk to the street and wheeled diagonally across to the corner where the two men turned right for corner and went towards the Boston & Albany railroad tracks. At the end of the street the chair was turned and the streets leading down to the fence which separates the tracks from the street.

They stopped at the top of the steps leading from the chair. With the conductor on one side and Mr. Collins on the other, and James R. Stevens close at hand, the train was started down the incline. The fence had been cut away, and slowly and carefully the electric woman went down the incline.

A few rods from the hole in the fence an engine attached to two cars, a special parlor car, No. 60, and a regular passenger car, No. 61, was waiting. The train was started, and until the platform of the parlor car was

Lifted on Steps of Car.

Two members of the party mounted to the platform of the car and turned to assist Mrs. Astor. With faltering steps she walked to the trunk and was practically lifted on it by two men. The maid and

FRANK FERDINAND'S Famous Furniture For Fastidious Furnishers

Sanitary and Clean, Clean and Sanitary

A Word on Bedding—There is more sickness caused by the filthy filling used by unscrupulous dealers in Mattresses and Pillows than by any other known cause.

Thousands purchase these bunches of filth and spend from 10 to 15 hours out of every 24 upon them, separated only by a thin layer of cotton cloth from this vast mass.

Extract from article written by an eminent doctor—public analyst—reporting on the danger of disease from cheap flock sold for bedding, says:

"Filthy, ill-smelling raggs are collected from dust heaps and shredded by machinery without the least preliminary cleaning or sterilization for use as Mattresses. He found that one gramme of flock yielded 7,500,000 colonies of bacteria as against 6,400,000 in a gramme of sawdust."

FRANK FERDINAND invites the closest inspection of his bedding room, which is one of the largest, cleanest and most sanitary in the world.

FRANK FERDINAND'S Bedding Department has been gaining in public favor since 1889. The GRANDCHILDREN of his first customers are purchasers of his reliable Bedding today.

I CAN SAVE YOU 25%

On Furniture, Bedding, Carpets, Rugs, Straw Matting, Oil Cloths, Baby Carriages, Ranges, Refrigerators and Dinner Sets. Cash or Credit.

PIANOS AND ORGANS.

We Are Still Fighting —THE— BIG PIANO TRUST

AND WE ARE WINNING THE FIGHT

The name "Piano Trust" sounds big, looks powerful and suggests a great many small piano dealers. The "Piano Trust" is a combination of piano dealers who have been cutting their prices for months—cutting—actually slaughtering—the prices and have been whipping the Big Piano Trust representatives in every N. E. State. We confess that we are making but little money doing it, but we are still in the ring and selling almost any make of high grade Pianos, new or second hand, at prices that make the Big Piano Trust sick.

Buy Your Piano With Your Brains

For a small amount of money and the use of a fair amount of brains you can get the best makes of pianos here at a price from \$100 to \$300 less than you can get at any large piano dealer's warerooms.

This is a fact—Don't take anyone's word for it. Investigate for yourself.

—Save your brains and save your money

WAKEFIELD's home run beats Stahl's Americans. NATIONALS shut out Phillies in final game. VANDERBILT auto race predictions by expert.

Boston Sunday American

Automobile and Sporting Section

BOSTON, SUNDAY, SEPT. 9, 1906.

GERMAN yacht wins race for Roosevelt cup. DEMOND at long odds first in Flat-bush stables. TROTTER races on Franklin field speedway.

WANNSEE, CROSSING THE FINISH LINE, WINNER OF THE FOURTH RACE FOR THE ROOSEVELT CUP IN SONDER CLASS RACES OF MARY HEAD.

PILGRIMS PRACTICALLY CLOSE SEASON HERE BY LOSING TO SENATORS

BY ALEXANDER C. SULLIVAN.

Baseball, golf and tennis tournaments are usually supposed to wind up in a blaze of glory, but yesterday the Boston Americans practically closed their season at home and their finish was anything but brilliant. The Pilgrims did not beat, played little inside ball, and as a result lost to the Senators, 5 to 2.

The men left on bases—that tells the story of why the Boston team was downed. They did plenty of hitting, but it was not forthcoming when it was needed. They had many men passed to first, but they weren't able to get around to home plate.

Klinton started to do the pitching for the Washingtons, but things looked bad for him in the second, and in the succeeding inning Manager Jake Stahl yanked him out of the box.

Tom Hughes relieved "Klinton," and he was as wild as a hawk, but got away with the game at that. In the sixth he tossed two bases on balls, and allowed the lead run to score. He pitched the rest of the game with one run.

In the eighth the Senators had three men on bases, two given on balls, and one walked. But after that last outburst from the box, he is a growler to Atlanta and was thrown out.

O'Connell on Rubber for Boston.

In the ninth, the Dartmouth boy, who has been improving steadily, and who can now pitch nine innings without obviously weakening as formerly, was on the rubber for the "Chickadees," and did creditable work. He hit one out and gave one free transportation, but that was the extent of his wildness.

In only two innings, the second and the sixth, was Glase battered hard by the Washington aggregation. With two on bases and two out, in the second, Walter Wakefield tossed a corking home run to the center-field fence, which resulted in three runs for the visitors.

The Bostonians played close in the field, but the work of the Senators was rather ragged. Jones and Cross making errors.

Glase pitched the last three innings fairly well, with the exception that he did not seem to control his fire, but he was fairly well, allowing the Capital City pitcher to get scratch hits through the place.

Armstrong and Carlson, who took the field in the ninth, however, Freeman had left for "Claret," and the Senators' class were the only members of the Boston line who did not hit safely. Glase and Stahl each got two safeties.

Wakefield was not very good for Boston in his period for a score, but, as usual, he was a single to left. Forie sacrificed to right, Stahl led off, and Glase hit a home run. Stahl led off with a single to left. Forie sacrificed to right, Stahl led off, and Glase hit a home run.

AMERICAN LEAGUE.

HOW THE CLUB STAND.

Team	W.	L.	P.
New York	75	40	115
Chicago	71	44	115
St. Louis	68	47	115
Philadelphia	67	48	115
Cleveland	66	49	115
Washington	65	50	115
Boston	64	51	115

GAMES YESTERDAY.

At Boston—Washington, 4; Boston, 2.
At New York—Cleveland, 4; St. Louis, 6.
At Philadelphia—Chicago, 4; Detroit, 3.

GAMES SCHEDULED TO-DAY.

Boston at Chicago. Cleveland at St. Louis.

Neither Did Anything in First.

Neither side did anything in the first, but in the second the Senators broke loose and put the game on fire right at the need. Anderson started to pitch, but Stahl was hit by a pitched ball. Altizer led off with a single, and then came the home run.

Wakefield pitched the rest of the game, but he was not very good for Boston in his period for a score, but, as usual, he was a single to left. Forie sacrificed to right, Stahl led off, and Glase hit a home run.

Continued on Page 40, Column 1.

Wakefield Struggled to Control.

The Senators threatened to score in the eighth. Wakefield singled to center, Hughes hit to Glase, and Wakefield was hit at second. Forie taking the throw still scratched a single to London, Jones hit to Morgan, and Klinton was forced at first. Morgan threw Klinton out.

The Pilgrims got very good for Boston in his period for a score, but, as usual, he was a single to left. Forie sacrificed to right, Stahl led off, and Glase hit a home run.

"Little Cy" Held Phillies Down to Single Hit in Last Game in Slowtown

Special to Boston Sunday American.

Philadelphia, Sept. 8.—The Boston Nationals defeated the Phillies this afternoon with a score of 4 to 0, their most convincing victory of the season. "Young Cy" Young pitched a beautiful game, allowing the few hitting quakers but a solitary hit, which was scored by Morgan, the first man in the fifth, but it amounted to nothing as he did not score.

Moser, the new pitcher from Lynchburg, Va., entered Young in the box, but he did not get very promising, on the whole. He pitched the first three innings fairly well, but in the fourth he was hit by a home run, and in the fifth he was hit by a home run.

Bates' Key Day.

Bates had a very busy day in the field, having six chances without an error, while Brown did not get a show. The Senators started right in on Moser in the first inning, doubling him, and then hitting him with a home run.

GERMAN YACHT TILLY, ONE OF THE COMPETITORS IN CUP RACES.

SAILED WITH GREAT SKILL, WANNSEE WINS THE FIRST RACE FOR GERMANS

Vim Fouls Caramba at the Start and Withdraws at Once.

Tremendous Ovation to the Winner as She Crosses the Finish Line.

SUMMARY OF THE ROOSEVELT CUP RACES.

Yacht	Time	Points
Wannsee	1:15:00	10
Caramba	1:16:00	8
Vim	1:17:00	6
St. Louis	1:18:00	4
Philadelphia	1:19:00	2

The fourth race, won yesterday by the German boat Wannsee, in a beautifully sailed contest on Marblehead, finished the preliminary series of the German-American regatta for the Roosevelt cup. The last America has learned to put her faith in the Vim—was with her at the start on a course of 10 miles, but she was not able to finish.

There could be no more pinning out to the race yesterday than to have to decide the winner in every heat. The popularity of the Vim was shown when the Wannsee crossed the line. The ovation was tremendous.
